

MARK MAX PLATINUM

Graco's top of the line electric sprayers for AIRLESS spraying of paints, fire retardant and airless plasters

Fast Flush.

www.graco.com

PROFESSIONAL ADVANTAGES

- QuikReel™ integrated hose reel, with 30 m of hose. Start spraying faster and go home sooner without the hassles of hose handling.
- E-Control™, precise pressure control at the end of your hose. Fine-tune or shut down your sprayer from wherever you are spraying. Finer finish and reduced overspray.
- With ProConnect™ quick pump exchange and kick back stand for easy bucket change.

Texture Applications

MARK V™ MAX PLATINUM - MARK VII™ MAX PLATINUM - MARK X™ MAX PLATINUM

MARK MAX PLATINUM

The Standard in Electric Airless!

After introducing the Mark V in the market, mid nineties, Graco became a real trendsetter for spraying plasters airless. The speed of airless, combined with a very smooth finish, became a standard in the industry.

The MARK V™ Platinum, a living legend

Easy, quick and reliable, the Mark V boasts a strong positive track record. Listening to contractors, all-over Europe, this all-rounder was gradually adapted to the most demanding wishes of our customers.

The MARK MAX PLATINUM: more for less!

With MARK VII MAX and MARK X MAX we proudly complete our Mark Platinum range, offering you maximum performance to complete all your jobs.

Delivering twice the performance of the MARK V MAX, the MARK X MAX Platinum is strong enough to spray over 30.000 liters a year. Too big for you? Try the MARK VII MAX, you will be charmed by it's price performance ratio.

Completed with proven features like ProConnect™ easy pump exchange tool, QuikReel™ hose system, E-control wireless pressure control and FastFlush cleaning system, we are ready to continue to set the trend in compact electric airless paint and plaster sprayers. Oh, and yes, we added 15 meters of hose, totalling 30 meters, a longer whip hose and a kick stand for easy bucket change. MARK MAX Platinum series; THE standard in electric Airless

MARK X™ MAX PLATINUM

MARK VII™ MAX PLATINUM

MARK V™ MAX PLATINUM

FastFlush.

QuikReel™

Integrated Hose Reel

Special layout design. Roll out and up in a few seconds up to 90 m hose, giving an autonomy to spray in a range of 180 m without transporting the unit. Holds: 90 m (1/4") / 60 m (3/8")

FastFlush™+ Heavy Duty Prime Valve

We did extensive research on how to decrease cleaning time and came to the following simple conclusion: to clean faster, you must run the pump faster. So that's what we did! The new FastFlush cleaning system runs the motor at a higher speed which results in high flow and faster cleaning. It's that simple!

NOTE: FastFlush is not available on MARK X MAX

Easy Out™ Filter

The Easy Out pump filter is designed to filter from the inside out so filters won't get stuck or collapse when they are filled with dirt or debris. It's large filtering area reduces tip clogs and ensures a quality finish. Filter removes with the cap which means less mess.

E-Control™

The wireless pressure remote control, attached to the hose, allows you to adjust pressure at any time without having to approach the unit. Robust, waterproof, solid design with 45 m reach.

Materials & Applications

The MARK MAX PLATINUM is a real multiple purpose unit for large painting jobs for the inside as well as the outside! Your most reliable buddy sprays airless plasters and most common paints.

The MARK MAX PLATINUM sprays latex, emulsions, acrylics, epoxies, blockfillers, fire retardants, intumescent and most common airless plasters. It even has enough performance to deliver the necessary flow for 2 people spraying simultaneously.

GOOD TO KNOW

PROCONNECT™ — NO TOOLS PUMP REMOVAL SYSTEM

DOWNTIME COSTS YOU MONEY!

The ProConnect pump removal system makes it easy to swap Endurance™ pump fast and easy. In a few seconds, on the job site, without tools. Just like your car tyres. Keep a spare!

PLASTER SYSTEM

Extend your platinum sprayer to a fully complete plaster system with the 90 liter hopper and bag roller if you spray materials delivered in bags.

SPRAY 700 m² in a day...
... with a 2 man crew. Use the container suction set, pumping directly from a 500 or 1000 liter container delivered by your material supplier ... Extremely effective, especially if all built into a van or trailer.

! TIP

For improved pump performance when spraying paint, replace the ceramic ball in the lower pump with the SST ball (delivered free with the unit).

The smartest SmartControl-E™

The digital SmartControl-E continually monitors how you spray and adjusts the pump's functioning in less than one second. Even with multiple guns, there is no delay in waiting for your sprayer to catch up and to keep your spray pattern consistent.

This smart brain coordinates all electronic devices such as the FastFlush™ timer, wireless pressure E-control™, (life time) liter counter, error coding and pressure rating. Simple, just by one button.
