#### TECH TIP:

*Use with 3M™ Fibre Disc Back-up Pads to optimize product life and performance of 3M™ Cubitron™ II Fibre Discs 982CX Pro.*

### 3M Precision-Shaped Grain re-engineered.

Conventional ceramic abrasive grain tends to “plow” through metal, causing heat to build up in the workpiece and the abrasive, resulting in a slower cut and shorter abrasive life.

Conventional Ceramic Abrasive

3M pioneered the first precision-shaped grain using 3M microreplication technology to form consistent sharp peaks that easily “slice” through metal—cutting cooler, faster and lasting longer than conventional abrasive grain.

3M Precision-Shaped Grain

And now, we’ve done it again.

### A new era of abrasive performance is here.

The first time you use 3M™ Cubitron™ II Discs 982CX Pro with the newly re-engineered, precision-shaped grains, you’ll instantly notice the difference. We’ve taken the legendary cutting speed and life of 3M™ Cubitron™ II abrasives to a new level—outperforming our original precision-shaped grain.

\*Results based on an automated, 11 minute test on 1018 steel using 3M™ Cubitron™ II Discs 982CX Pro, 7 inch disc and 3M™ Disc Pad Face Plate Ribbed 80514 on a servo motor.
