3M™ Two-sided Sanding Sponge

Scuffing made simple.

Power through projects with a two-sided sanding sponge that delivers up to twice the life*, reducing downtime and replacement costs. Its soft, conformable foam wraps around contours, edges, and profiles to help maintain consistent contact and a uniform finish. Colour-coded grades take the guesswork out of grit selection, helping you move quickly from rough shaping to fine finishing. A durable, waterproof bonding system is built for wet or dry use throughout the job.

Features

Improve productivity with 2x product life*

Abrasive surfaces on both sides allow you to simply flip the sponge and continue sanding without interruption.

Conformability for shapes and contours

Low-density, soft foam provides flexibility for hand sanding shapes and contours, helping you achieve a consistent, uniform scratch profile.

Versatile product portfolio

Colour-coded sponges make it easy to identify the right option for the job, and a waterproof bonding system provides the flexibility to sand by hand in either wet or dry applications.

Versatility Designed for Collision Repair Applications

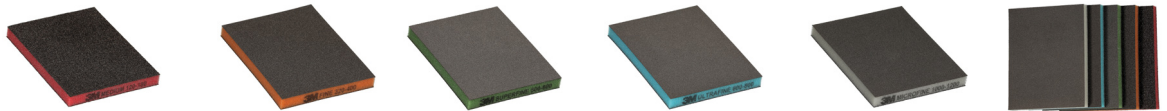

The 3M™ Two-Sided Sanding Sponge is designed to last, helping reduce interruptions and material waste while providing reliable performance across tasks. Its conformable foam maintains steady contact on contours and edges for a consistent finish, and the colour-coded grades make it easy to choose the right abrasive.

Recommended Grades for Use
