

NEW 2010 FULL FACE AIRFED MASK

The **NEW VIUAF2010KIT** Anest Iwata 2110 Air fed mask has been developed with the operator in mind. The mask is functional, stylish, comfortable and lightweight.

The **2010** Air fed mask has a **new** upward air flow for operator comfort and to protect the user from 2 pack paints. This balances the positive pressure, and also helps against irritation of the eyes when the mask is used for long periods

The **NEW** 2110 air fed mask is certified as **class 3** which is required for 2 pack paints, the masks requires a visible or audible warning for this certification.

- **Upward air flow, means less irritation to eyes, when used for long periods.**
NEW!
- **The new warning made from one complete pipe, this means no joints.**
